BOREAL CENTRE for Bird Conservation

Winter Education Programs

Calling all teachers, on-line learners and home-schooling families!

With current COVID restrictions, we will be adapting and bringing our popular curriculum based school programs to you this winter. Choose the delivery method that works best for you: a virtual classroom program, a mix of online and hands-on self directed activities, a winter fieldtrip in your schoolyard, or join our educators in a forest near you. Book early to ensure your spot in the New Year!

Kindergarten

Winter Explorers

Explore the plants and animals of the boreal forest in winter! Program includes an interactive component plus hands-on student activities

Grade 1

Seasonal Mix-up

Explore how plants and animals have adapted to survive the cold winter months! Interactive online program with student activities match plants and animals to their winter adaptations.

Grade 2

Exploring Hot & Cold Temperature

Learn to describe temperature including a hand-on experiment to discover how chickadees stay warm in the winter!

Grade 5

Snow Study

Be a snow scientist! Dig a snow pit and examine the properties of temperature and snow. Link weather and crystal structure to animal behaviour and human activity!

All Grades

Winter Survival Skills

Fire lighting, shelter building, snowshoeing, and orienteering! Master some survival basics on this exciting field-trip with our instructors.

winter Ecology Hikes

Enjoy a guided snowshoe hike to discover the plants and animals that thrive in the boreal forest during the winter season.
