

What's Your Wingspan??

Spread your arms out as far as they go and make your fingers as long as you can. Ask an adult to measure the distance from one fingertip to the other fingertip with a measuring tape - this is your wingspan! If you don't have a measuring tape, it's okay to guess too.

Which bird has the same wingspan as you? Choose the best answer!

Bird	Wingspan	About the same length as:
 A. Istvan Canada Warbler	11.9 cm	 A toilet paper tube
